

MICROLENSING 2026

28th International Microlensing Conference

23 – 27 February 2026

Heidelberg

TOPICS:

- **Methods:** Astrometry, Interferometry, Polarimetry, Spectroscopy, Photometry
- **Populations:** Exoplanets, Exomoons, Stellar Remnants, Unbound Planets, Binaries and more
- **Ground-based Facilities & Space Missions:** ELT, Earth 2.0 (ET), Euclid, Gaia, KMTNet, MOA, OGLE, PRIME, Roman, Rubin, VLT and more
- **Statistical Approaches & Numerical Tools**
- **Extragalactic Microlensing (Quasar Microlensing)**
- **New Results & Innovative Concepts**

LOCAL ORGANIZING COMMITTEE:

Markus Hundertmark (Co-Chair)
Zofia Kaczmarek
Robert Schmidt
Guido Thimm
Yiannis Tsapras
Joachim Wambsganss (Co-Chair)

SCIENTIFIC ORGANIZING COMMITTEE

Etienne Bachelet (Université Marie et Louis Pasteur, Besançon)
David Bennett (NASA/GSFC and University of Maryland)
David Buckley (SAAO, Cape Town)
Arnaud Cassan (Sorbonne Université, Paris)
Markus Hundertmark (Heidelberg University)
Macy Huston (UC Berkeley)
Zofia Kaczmarek (Heidelberg University)
Eamonn Kerins (University of Manchester)
Somayah Khakpash (Lehigh University, Bethlehem)
Shude Mao (Westlake University, Hangzhou)
Radek Poleski (University of Warsaw)
Nicholas Rattenbury (University of Auckland)
Rachel Street (Las Cumbres Observatory, Goleta)
Takahiro Sumi (Osaka University)
Joachim Wambsganss (Heidelberg University)
Weicheng Zang (Harvard-Smithsonian CfA, Cambridge)
